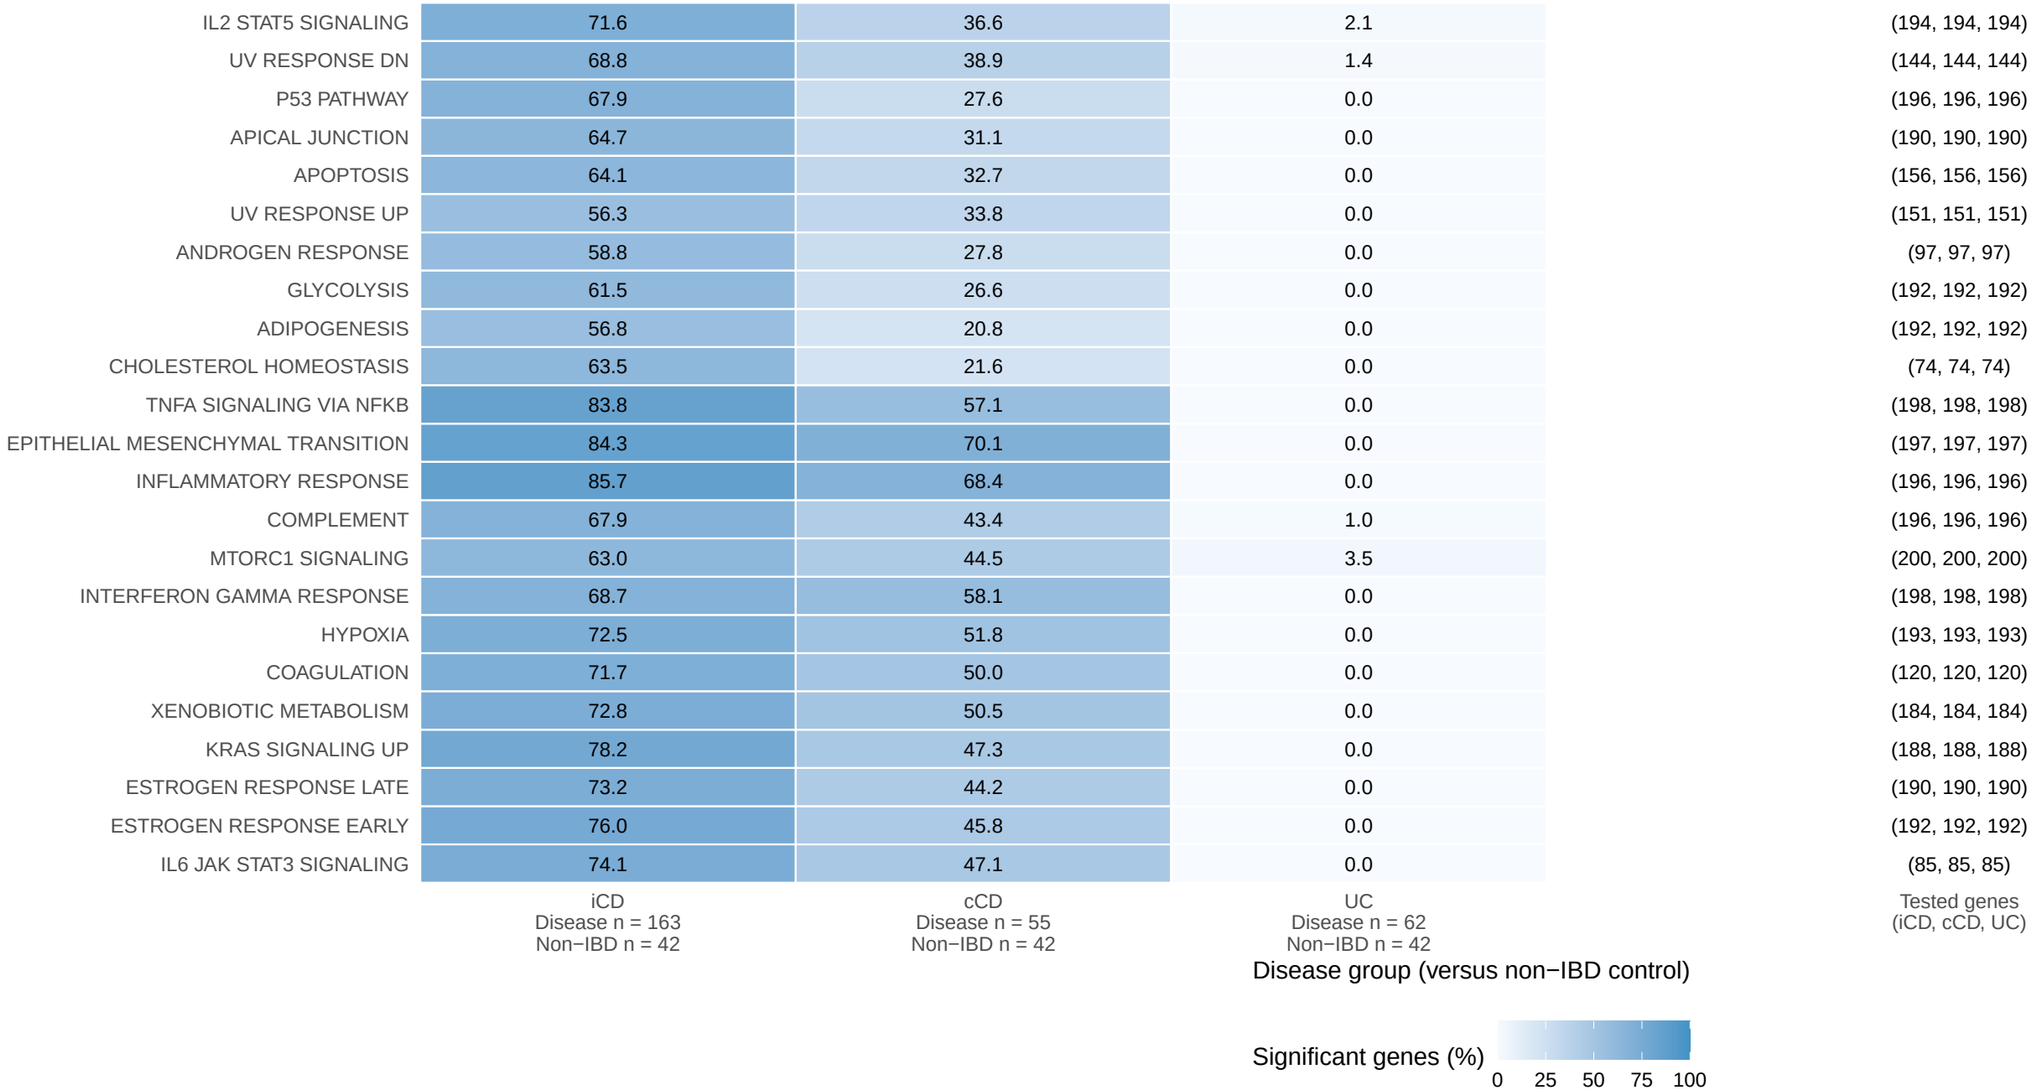
IBD Hallmark pathway DISCO significance

Within−pathway BY q < 0.05 | At least 50% significant genes in any comparison | 23 pathways



100 x significant genes / tested genes within each pathway and comparison. Untested genes excluded.
Right−hand counts follow the comparison columns; full names and display labels are saved in heatmap_row_order.csv.
Rows: hierarchical clustering, Euclidean distance, complete linkage; no scaling.
